

WHEN INFORMATION ORGANIZATION IS ESSENTIAL

Law firms have Law Libraries even with today's online search engines and most are designed to impress potential clients. Not only do they need to look good but they need to provide a great source for information. Beyond the Library there are Case Rooms (some call them War Rooms), File Rooms, Pantries, basement storage rooms, mailrooms and storage areas for things like exhibit indexes and minute books.

Vital Valt is a dealership that has designed, sold and implemented storage solutions for each of these areas. Getting the best looking end panels in Veneers or HPL adds to the look desired.

File rooms are often designed around high density to save space. War Rooms are designed to hold anything from file

folders, Record Boxes, and Binders. A trend to have trail documents in binders has been changing the vertical space needs for these case rooms. Many law libraries are downsizing today, finding re-use for those shelving units is something Vital Valt can help. Basement storage rooms are great places to re-use old shelving.

As projects get designed it's important to complete the relocation of shelving, the installation of new shelving, and the application of any new file systems ON TIME! We excel at this task.

Vital Valt offers turnkey design, sales and on-site assembly of Secure Storage Systems. **Call us for a free quote at (800) 699-1191.**
