

Equipment
Rotary File Systems

EXTREMELY VERSATILE

Rotary File Storage Cabinets are two cabinets in one, with a rotating base allowing for access to two sides of a storage cabinet in the same frame.

Rotary files come standard with a key lock to secure the contents, with additional locking mechanisms available if required.

Available in letter and legal size depths for file folder storage, Rotary Files can also be configured to store media, hanging folders, binders, tools, parts and supplies. The ability to house roll-out drawers for top tab file folders and shelves

above for end tab folders and being able to rotate the unit to have the same or a completely different configuration on the other side gives great flexibility.

Rotary Files can be placed side by side, back to back or into alcoves or the wall depending on your space available.

Vital Valt offers turnkey design, sales and on site assembly for Rotary File Storage Systems.
