

INDUSTRIAL STORAGE SOLUTIONS

Automated Vertical Storage: Material Handling systems are designed to improve productivity and decrease the amount of physical floor space required. Utilizing the vertical space in facilities with Automated Storage and Retrieval Systems, one could use both vertical carousels and vertical lift modules for secure and efficient parts storage.

Pallet Racking: Another system utilized in material handling is Pallet Racking. Fixed pallet racking systems however require large aisle turnarounds for forklifts and require large warehouses. Utilizing compact shelving can reduce warehouse footprints in half with Heavy Duty compact shelving systems for pallet racking eliminating the need for fixed aisles.

Workbenches & Drawer Cabinets: Workbenches in the office and workroom's require a specialized configuration to meet your unique storage requirements. Vital Valt offers a plethora of workbenches and options for working workbenches and storage. Workbenches are available as stationary or mobile with caster bases depending on your requirement. Whether you need basic work benches or ESD kitting workstations with adjustable work surfaces, we can help you with your requirements.

Workbenches are available with numerous accessories and several work

surface dimensions for each of the surfaces offered: painted steel, stainless steel, laminated wood, wood composite, laminated and dissipative plastic.

Industrial Shelving, Catwalks & Mezzanines: Industrial Clip Shelving is the system of choice when heavy duty steel shelves are required. These high performance shelves are available in eighteen different sizes, either 20 or 22 gauge steel, and can handle loads of up to 1,000 pounds per shelf. Shelves attach with compression clips to any of three upright styles, making assembly and reconfiguration easy. Double-deck steel shelving units with a grated catwalk between aisles, enables companies to move up, not out. These industrial storage shelves are the perfect solution to your expansion needs. By utilizing available vertical space, storage areas can be significantly condensed, thus containing operating costs.

Woven & Welded Wire Security Cages can be used to partition off work areas, create caged spaces of secure space and to secure Pallet Rack sections. SCIFs buildings are sensitive compartmented information facility use for sensitive secure working areas.

Vital Valt offers turnkey design, sales and on site assembly of Material Handling Solutions. **Call us for a free quote at (800) 699-1191.**
